

Website Security and Marketing

0404 29 88 10

HAPPY CUSTOMERS

With so much of our data going digital, it's more important than ever to secure your websites and protect your customers' experience - not to mention your own cyber security! Takes these simple steps to protect yourself and your business.

Website Defaults

There are many defaults which hackers know about. You need to do what you can to remove these default vulnerabilities.

SSL Data Transfer

Setting your site up for SSL - https:// - secures the data transferred between your site and client's browser.

Strong Passwords

Find a simple formula for your passwords so that every password is different and difficult to hack.

WEBSITE SECURITY ESSENTIALS
